Profile

Results-driven Full-Stack PHP Developer with a primary focus on backend API development. Possessing 3 years of hands-on experience in creating robust web applications. Proficient in PHP programming, backend API design, and database management. Skilled in utilizing web frameworks and version control for efficient development. Committed to delivering secure, high-quality code and exceptional user experiences. Adaptable team player with a strong problem-solving mindset. Eager to leverage my expertise in both backend and frontend technologies to contribute to innovative projects.

Work Experience

10/2024 – present
United States, Maine

Sr Backend Developer
Muscatek
- Conducted thorough code reviews that promoted high-quality software development practices amongst team members.
- Refactored legacy code to improve maintainability and align with modern programming techniques.
- Analyzed system requirements alongside project stakeholders, translating those needs into actionable development tasks for the team.
- Troubleshot complex technical issues to identify root causes, developing effective solutions to prevent future occurrences.

11/2023 – 09/2024
SURAT, India

Sr PHP Developer
TPots (Technical Pots)
- **Web Development Expertise**: Over 4 years of hands-on experience in developing and maintaining web applications.
- **Laravel Proficiency**: Proficient in Laravel, including version 9.19, utilizing its features such as task scheduling, workers, and advanced authentication systems.
- **Environment Management**: Skilled in managing development environments with tools like Docker, WAMP, and Nginx.

08/2021 – 10/2023
Surat, India

Jr. PHP Developer
Potenza Global Solutions ⬈
- **Web Development Expertise**: Contributed to designing and developing web applications, showcasing strong skills in PHP and Laravel.
- **Task Automation**: Implemented automation using Laravel schedules and workers to streamline workflows and enhance efficiency.
- **Custom Packages Development**: Developed reusable components and custom packages to optimize development processes.
- **Server Management**: Managed server environments using tools like Nginx and Docker for deployment and scalability.
- **Team Collaboration**: Collaborated with cross-functional teams to deliver high-quality, client-focused solutions.

| 01/2021 – 07/2021 | **PHP Intern** |
| Surat, India | *Potenza Global Solutions* ⇗ |

- **Learning and Skill Development**: Gained hands-on experience in PHP development, laying a strong foundation for a career in web development.
- **Web Application Development**: Assisted in building and maintaining web applications under the guidance of senior developers.
- **Laravel Exposure**: Received initial exposure to Laravel, understanding its core functionalities and implementing basic features.
- **Database Management**: Worked with MySQL to create and manage database schemas for web applications.
- **Team Collaboration**: Collaborated with the development team to meet project goals and timelines.
- **Debugging and Testing**: Participated in debugging and testing applications to ensure optimal performance.

Education

2019 – 2021	**MCA**
Bardoli, India	*SRIMCA, Uka Tarsadia University* ⇗
	8.80 CGPA

2016 – 2019	**BCA**
Bardoli, India	*SRIMCA, Uka Tarsadia University* ⇗
	8.34 CGPA

2015 – 2016	**H.S.C (Commerce)**
Vasai, India	*KK Shah Junior College*
	65.54%

2013 – 2014	**S.S.C**
Vasai, India	*St. Francis High School*
	63.80%

Skills

PHP (CodeIgniter, Laravel, WordPress,)	Python
MySQL	MongoDB
PostgreSql	AWS expertise
Microservices architecture	RESTful API integration
Software architecture design	Scrum framework
Test-driven development	Object-oriented programming
Docker containerization	Git proficiency
Design patterns	Performance optimization
NoSQL databases	

Languages

- English
- Hindi
- Gujarati
- Marathi

Projects

Clinic Appointment Management System (Laravel)
- **Technology**: Laravel, MySQL, JavaScript
- **Description**: A comprehensive **appointment scheduling** web application for **clinics**, enabling **patients** to book appointments easily and **clinic admins** to manage schedules. The system features **user-friendly interfaces**, **database management**, and **automated notifications** to ensure smooth operation.

Shivyog
- **Technology**: Python, Django, React, API Integrations
- **Description**: Developed an app to support **spiritual content**, featuring **subscription models** for accessing exclusive material, **offline viewing**, and a **live streaming** system. The app also integrates a **code-based content access** for event attendees and incorporates **API integrations** for seamless communication.

Readers Choice Awards
- **Technology**: Laravel, Inertia.js, Vue.js
- **Description**: Built a **voting platform** for users to choose their favorites in various categories. Implemented an **Inertia.js admin panel**, **Vue.js frontend**, and **API integrations** to ensure smooth voting and management. The platform can handle **high traffic** securely during voting events.

Love Love Tennis (LLT)
- **Technology**: Laravel, Filament, Flutter, API Development
- **Description**: Developed a **community app** for women tennis players, enabling **subscription-based content** and member interactions. Built using **Laravel API** and **Filament admin panel**, with **Flutter** for the **mobile frontend**, providing a smooth user experience and easy content management.

Indian Apparel
- **Technology**: Laravel, Filament, React, WordPress API, PhonePe Integration
- **Description**: Created a **directory listing** platform for **Indian apparel**, accessible to **subscribed users**. Integrated **secure payments** via **PhonePe**, **newsletter subscriptions** with **Sendy**, and **WordPress API integration** to provide dynamic content and enhance user engagement.

WeeklyWODThrowDown (CodeIgniter)
- **Technology**: CodeIgniter, Twilio, Stripe, RESTful API
- **Description**: Developed a web application for **fitness enthusiasts** to log workouts and track progress. Integrated **push notifications**, **real-time updates**, **Twilio SMS/WhatsApp**, and **Stripe** for **premium services**, improving user engagement and providing a seamless experience.

SadhnaSites (WordPress)
- **Technology**: WordPress, Stripe, Razorpay
- **Description**: Built a **multi-site platform** for a **religious organization**, offering **document management**, **event scheduling**, and **donation processing**. Integrated **Stripe** and **Razorpay** for secure, global **payment processing**, catering to the organization's worldwide audience.

LevShelTorah (Active Design Framework)
- **Technology**: Laravel, Stripe, PayPal, PDF Generation
- **Description**: Developed an **ERP system** for **task management**, **client billing**, and **data visualization**. Integrated multiple **payment services** like **Stripe**, **PayPal**, and **Square**, and created **dynamic PDF templates** for **invoices**, **reports**, and **certificates**.

BaronTechnologies (Laravel)
- Built an ERP system for task management, client billing, and data visualization, integrating multiple payment services like PayPal and Stripe. Developed dynamic PDF templates for invoices, reports, and certificates.

ArgumentMap (Laravel)
- **Technology**: Laravel, Treeflex Library, JavaScript
- **Description**: Built a **gamified learning platform** using **argument mapping** to create interactive **puzzles** and challenges. Utilized the **Treeflex Library** for managing **hierarchical data structures** and enhanced **user engagement** with dynamic, **JavaScript-driven** content.

ReliveredApp (CodeIgniter)

- **Technology**: CodeIgniter, Stripe, Twilio
- **Description**: Developed a **package delivery tracking** app integrated with a mobile app, featuring **secure payment processing** via **Stripe** and **real-time SMS notifications** using **Twilio**. Enabled **subscription management** to enhance the user experience.

Tutnumnet (Laravel)

- **Technology**: Laravel, Firebase, Twilio
- **Description**: Built an **admin panel** and **backend API** for a mobile app focused on **daily routines** and **goal tracking**. Integrated **push notifications** using **Firebase** and **Twilio SMS** to provide timely reminders, helping users stay on track with their goals.

DriveBuddy (Node.js, React)

- **Technology**: Node.js, React, API Integration
- **Description**: Developed an **admin panel** for a platform using **Node.js** for the backend and **React** for the frontend. Integrated various **APIs** to streamline backend/frontend communication, while ensuring **real-time data handling** and **notifications** to keep users informed.

Certificates

- Certification of course "Remote Sensing and Digital Image Analysis" IIRS, Government of India.

- Cleared C++, Java training spoken tutorial project, IIT Bombay held by SRIMCA, UTU.

- A Certification of appreciation for securing gold model in MCA by Uka Tarsadiya University ⬈

- Letter of appreciation from supporting IT cell of AAN in development of software for Cadets "AAN".

- Certificate for getting pass in MINAXI – LALIT SCIENCE TEST, Gujarat University.
